

## Internet Explorer Mode in Microsoft Edge

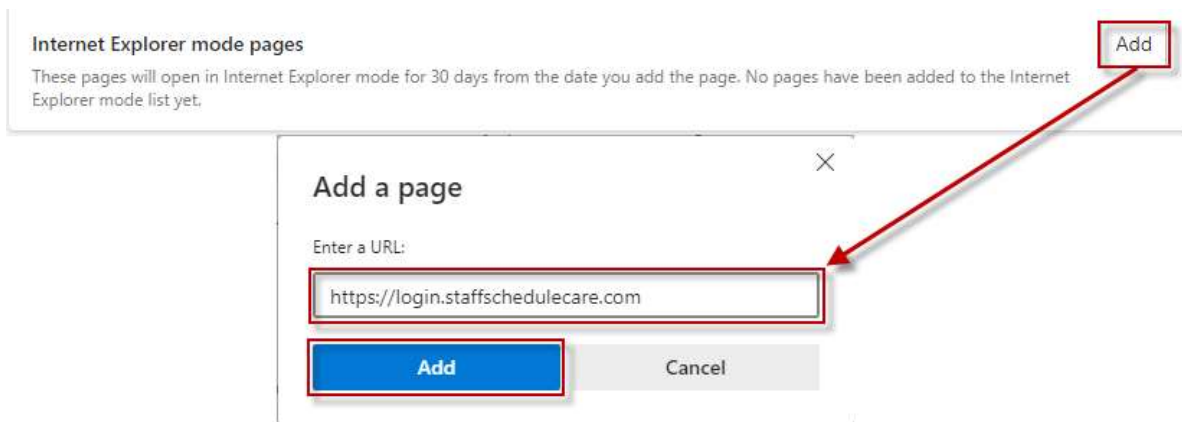

1. Open Microsoft Edge and in the address bar type `edge://settings/defaultbrowser` then press enter.
2. Under the **Allow sites to be reloaded in Internet Explorer mode** heading click the drop-down menu and select **allow**.

3. Click the blue **Restart** button.

4. Microsoft Edge will close then re-open where you left off. Under the **Internet Explorer mode pages** heading click the **Add** button. In the Add a page dialogue box type <https://login.staffschedulecare.com> and click **Add**.

**Note:** This setting will expire every 30 days due to Microsoft phasing out support for Internet Explorer. You will need to repeat the steps in this document when this occurs.
